

## **Features**

Frequency range of 10 kHz to 10 MHz Fully compliant with MIL-STD 461 "Air-core" inductors to prevent saturation Individual Calibration Included **Three-Year Warranty** 

## Description

The LI-400C Line Impedance Stabilization Network (LISN) provides the necessary measurement platform for performing power line conducted emissions compliance testing as required by most worldwide standards for commercial products. The LI-400C is compliant with MIL-STD 461.

The LISN provides defined stable impedance and isolates the EUT from power source influences, thereby providing accurate and repeatable results.

The LI-400C includes one pair of, separately housed, single-conductor networks, to be installed in series with each current-carrying conductor in a singlephase, dual-phase or DC power system. A second LI-400C pair can be used to accommodate 3-phase power systems (Wye or Delta configurations).

The LI-400C is equipped with Superior Electric SUPERCON<sup>®</sup> shrouded sockets at the mains (power input) and EUT (power output) ports. The matching color-coded plugs for connection to the mains and EUT wiring are included.

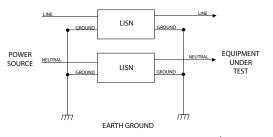

This LISN uses air-core inductors to prevent saturation and permeability variation. The mounting plate of the LI-400C is left unpainted in order to facilitate connection to earth ground in its installation, which is essential due to high leakage current.

Use of a Transient Limiter for impedance matching, reduction of out-of-band emissions and transient protection for your measurement instrument is highly recommended and available from Com-Power.

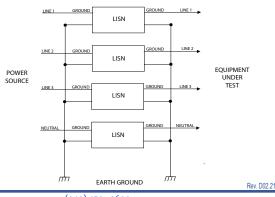

All Com-Power LISNs are individually calibrated in compliance with the relevant requirements of MIL-STD 461. Impedance and Insertion Loss data is supplied with each unit, along with the calibration certificate.

## **Typical Connection Diagrams**

Single Phase connection with one set of LISN

Three Phase connection with two sets of LISNs

## Application

Product Name	Line Impedance Stabilization Network (LISN)
Specification	MIL-STD 461
Application	Power line conducted emissions tests
Frequency Range	10 kHz to 10 MHz
RF Connector	50Ω N-type (female)
Current Rating	25 Amperes
Voltage Rating	270 VAC (Line to Ground) 50 - 400 Hz, 380 VDC
Inductors	50 μH (air-core)
Mains & EUT Connections	Superior Electric SUPERCON® shrouded sockets
Dimensions (each network)	15 x 7 x 7 inches / 38 x 17.7 x 17.7 cm
Weight (each network)	6 lbs. / 2.7 kg

All specifications are subject to change without notice. All values are typical, unless specified.
